BACKGROUND

ABOUT

Senior Full Stack Engineer with expertise in ERP systems, legacy code modernization, and scalable web applications. Proven track record in reverse-engineering complex codebases, architecting microservices, and delivering end-to-end business solutions. Specialized in Python/Django, JavaScript frameworks, and cloud infrastructure.

WORK EXPERIENCE

Senior Full Stack Engineer, Nehemiah-and-Williams

Aug, 2025 - Sep, 2025 1 month

Architected and developed eCommDispatch, a headless ecommerce storefront platform built on a custom Fleetbase fork. Led technical debt reduction initiatives and modernized legacy systems.

- Architected and developed eCommDispatch, a headless ecommerce storefront platform built on a custom Fleetbase fork
- Reverse-engineered and debugged legacy codebase, identifying and resolving critical system regressions
- Modernized EmberJS framework from legacy version to contemporary setup, improving performance and maintainability
- Integrated eCommDispatch with HiddenHole mobile application, supporting deployment on Apple App Store and Google Play Store
- Led technical debt reduction initiatives, refactoring complex codebases for improved scalability
- Implemented comprehensive API integrations for seamless ecommerce and logistics workflows
- Optimized platform architecture to support multiple use cases across diverse client requirements

Full Stack Developer, Vuna Capital Automation

Jun, 2025 - Aug, 2025 3 months

Developed innovative ERP systems including CustomK9 for dog training management and KijaniKraft for paper bag manufacturing operations.

- Developed CustomK9, an innovative Odoo-based ERP system connecting dog trainers with dog owners
- Built comprehensive training plan management system with appointment scheduling and progress tracking
- Implemented role-based access control for trainers and pet owners with distinct workflow management
- Deployed production system achieving high availability and user engagement (customk9-beta.vercel.app)
- Architected KijaniKraft manufacturing platform using Frappe-ERPNext for paper bag manufacturing operations
- Designed end-to-end business process automation covering manufacturing, inventory, and sales operations
- Integrated complex manufacturing workflows with real-time inventory tracking and financial reporting
- Delivered scalable ERP solution supporting complete business operations (kijanikraft.vuna.io)

Backend/AI Engineer, Afrib AI

Mar, 2023 - Dec, 2024 1 year 10 months

Led development of AI Agent specialized in Kenyan Law, integrating NLP models with legal databases. Designed and implemented scalable microservices architecture.

- Led development of an AI Agent specialized in Kenyan Law, integrating NLP models with legal databases
- Designed and implemented RESTful APIs and microservices using Python/Django, improving system modularity and scalability
- Optimized database queries and schema designs, resulting in 40% improved response times
- Implemented CI/CD pipelines using GitHub Actions, reducing deployment time by 60%
- Integrated third-party services and APIs to extend platform functionality
- Collaborated with legal experts and cross-functional teams to deliver features aligned with business requirements
- Deployed and maintained cloud infrastructure on AWS, including EC2 instances, S3 buckets, and RDS databases

ICT Staff (ERP System), Maseno University

Jan, 2023 - Aug, 2024 1 year 8 months

Contributed to the development and maintenance of the university's Enterprise Resource Planning system, ensuring 99.5% system uptime.

- Contributed to the development and maintenance of the university's Enterprise Resource Planning system
- Implemented data validation and security measures to protect sensitive student and faculty information
- Troubleshoot and resolved complex technical issues, ensuring 99.5% system uptime
- Collaborated with academic departments to implement customized modules based on specific requirements
- Created comprehensive documentation for system features and processes
- Provided technical support and training to university staff on effective ERP system utilization

Fullstack Developer, Flag42 and Azimio La Umoja One Kenya Coalition

Apr, 2022 - Aug, 2022 5 months

Built Azimio's Agent reporting application with React and Django, tracking tally counts from agents nationwide.

- Built Azimio's Agent reporting application with React and Django, tracking tally counts from agents nationwide
- Identified and documented detailed business rules and use cases based on requirement analysis
- Researched and resolved data integrity issues for mobile apps handling information from over 20,000 clients
- Utilized data visualization tools to effectively communicate business insights for UX design decisions

Backend Developer Intern, Cloudfactory and Citizen App

Jan, 2021 - May, 2022 1 year 5 months

Adapted and implemented Agile and Scrum methodologies in writing high-quality code to meet customer requirements.

- Adapted and implemented Agile and Scrum methodologies in writing high-quality code to meet customer requirements
- Collaborated with frontend developers and team members to design cohesive and functional code
- Developed unit test cases for testing and automation

PROJECTS EXPERIENCE

eCommDispatch

Aug, 2025 - Sep, 2025 1 month

Headless ecommerce storefront platform built on custom Fleetbase fork for logistics and commerce integration

- Reverse-engineered and modernized legacy Fleetbase codebase for enhanced ecommerce capabilities
- Migrated EmberJS framework from legacy version to contemporary setup, improving performance by 35%
- Implemented comprehensive API layer supporting multiple ecommerce use cases and client requirements
- Integrated seamlessly with HiddenHole mobile application for iOS and Android platforms
- Architected scalable microservices infrastructure supporting high-volume transaction processing

CustomK9 ERP Platform

Japanese

Jun, 2025 - Aug, 2025 2 months

Odoo-based ERP system connecting dog trainers with pet owners for comprehensive training management

- Built end-to-end training management system with appointment scheduling and progress tracking
- Implemented role-based access control with distinct workflows for trainers and pet owners
- Designed comprehensive reporting dashboard for training analytics and business insights
- Deployed scalable production system handling multi-tenant operations across diverse training facilities

KijaniKraft Manufacturing ERP

Jun, 2025 - Aug, 2025 3 months

Frappe-ERPNext platform for paper bag manufacturing covering end-to-end business operations

- Architected comprehensive manufacturing workflow automation from raw materials to finished goods
- Implemented real-time inventory tracking with automated reorder points and supplier management
- Built integrated sales and financial reporting system with custom manufacturing cost calculations
- Designed production planning modules with capacity optimization and quality control checkpoints

UoNTube

Jan, 2023 - Sep, 2025 2 years 7 months

Video-lecture platform integrating NextJS, Fastapi, Raspberry Pi and fine-tuned multimodal LLMs

- Developed an advanced video-lecture platform to enhance learning experiences
- Implemented NextJS frontend with FastAPI backend for efficient content delivery
- Integrated Raspberry Pi hardware solutions for classroom recording capabilities
- Fine-tuned multimodal LLMs to process and contextualize video lecture content

KenyaRE Underwriter

Sep, 2022 - Mar, 2023 6 months

KBS AI bot that automates Kenyare's facultative underwriting

- Containerized Sen's KBS AI bot using Docker, improving deployment efficiency
- Split application into three containers: Svelte frontend, FASTAPI backend, and NGINX load balancer
- Implemented microservices architecture for better scaling and maintenance
- Designed load balancing system to handle incoming traffic and distribute requests

MonkePaw

Mar, 2022 - Aug, 2022 5 months

A compiler for custom Monke language (variation of Robert Nystrom's Lox)

- Built a compiler with Go frontend and Python backend for translating Monke to Python code
- Implemented lexical analysis, parsing, and code generation components
- Designed and implemented custom language features extending Nystrom's Lox language
- Created documentation and examples showcasing language capabilities

SKILLS

Programming Languages

Python PHP JavaScript C++ SQL TypeScript Bash/Fish PowerShell

Frameworks & Libraries

Django React Node.js Express.js Bootstrap/TailwindCSS/ShadCN/RippleUI EmberJS Frappe Framework ERPNext Odoo

Databases

PostgreSQL MySQL MongoDB Redis MariaDB

Cloud & DevOps

AWS Google Cloud Platform Docker CI/CD GitHub Actions Vercel Railway

Tools

Git Jira Postman VS Code Bench (Frappe)

Methodologies

Agile Scrum Test-Driven Development Legacy Code Refactoring Reverse Engineering

Specialized Technologies

RESTful API Design Microservices Data Analysis Machine Learning NLP IT Audit principles ERP Systems
Business Process Automation Headless eCommerce Mobile App Integration

EDUCATION

Computer Science, BSc, University of Nairobi

Sep, 2021 - Jun, 2025

Kenya Certificate of Secondary Education, KCSE, Maseno School

Jan, 2011 - Nov, 2014

CERTIFICATES

Google Cloud Platform Associate Cloud Engineer, Google Cloud

Issued on:

VOLUNTEER WORK

Co-founder, CD4Data - Data Analysis/Science Society

Nov, 2021 - Sep, 2025

Co-founded a data science community at the University of Nairobi to help students navigate data science career options.
