Hiring Manager
Save the Children International
Kenya Country Office

Dear Hiring Manager,

Re: Information Technology Intern, Kenya

I am writing to apply for the IT Intern position at Save the Children International. I hold a Bachelor of Science in Computer Science (Second Class Upper Division Honours) from the University of Nairobi, and I bring three years of professional software and systems experience across enterprise environments, cloud infrastructure, and end-user support.

At Maseno University, where I served as ICT Staff for the ERP system, I provided direct technical support to staff, troubleshot complex system issues, maintained 99.5% uptime, implemented data security measures, and produced documentation for system processes. This is the closest analogue in my background to the L1 helpdesk and IT asset management work described in this role, and I am well prepared to replicate it in Save the Children's field office environment.

Beyond support work, I have built and deployed full-stack applications in Python, Django, React, and Next.js, and have architected ERP systems using Odoo and Frappe for clients at Vuna Capital. I am comfortable with Microsoft 365, SharePoint, and Power Automate, and have hands-on experience with CI/CD pipelines, AWS infrastructure, and incident management. These capabilities position me to contribute meaningfully to the Technology for Development (T4D) initiatives your team is building.

I co-founded CD4Data, the data science community at the University of Nairobi, and served as Cloud Track Lead for Google Developer Student Clubs, UoN. Both roles required translating technical concepts to non-specialist audiences, a skill I will bring to user training and support delivery across Save the Children's Kenya and Madagascar offices.

I am available immediately and ready to support the full breadth of the internship's responsibilities. Thank you for your consideration, and I look forward to the opportunity to discuss my application.

Yours sincerely,

Tevin Joel Aduma
